1. Using dowels and glue, form up three legs using parts 01a (Leg) and 01b (Leg).

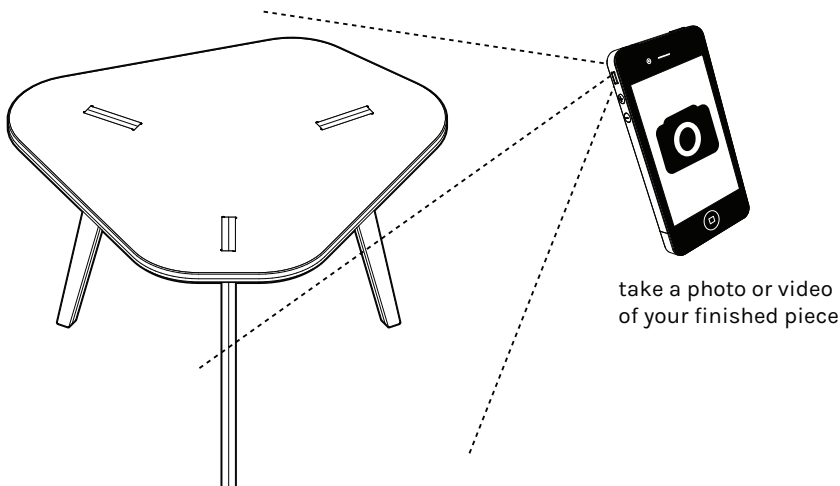

2. Using dowels and glue, bond part 02 (Top-A) to part 03 (Top-B) to form a single top.

3. Feed the legs through the table top from above (in practice this is best achieved by propping the top on its side and feeding the legs through before tipping the table to sit top-down on the floor).

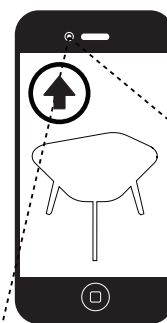

4. Using two no. part 04 (Wedges) secure the leg to the top by pushing or malleting the wedges from either side through the hole in the leg so that they form a secure joint.

You can take photos of the assembly process at various stages and share these on the OpenDesk website using your unique QR-code below. Should you encounter any problems during assembly, please feel free to post these to the website for review and response using the same method.
